

August 26-27 2013, Villeneuve d'Ascq, France

Invited session on

Industrial Process Control

Chairmen: Prof. **Dumitru Popescu**, University „Politehnica” of Bucharest, Automatic Control and Computer Science Faculty (dpopescu@indinf.pub.ro), Prof. **Pierre Borne**, Ecole Centrale de Lille (pierre.borne@lille1.fr)

Description: The session includes papers covering relevant aspects in the fields of Identification, Control, Optimization, Robustness Analysis and Supervision for industrial process control.

The papers present both theoretical and practical results by addressing advanced techniques used for the design and implementation solutions in power energy systems, chemical and petrochemical industry, transportation and biotechnologies. The contributed results are validated not only in simulation scenarios but also in practical applications on different case studies relevant to the industrial area.

All session papers have a high scientific level and were selected based on their relevance to the session topics

Authors must submit their proposal through the conference web site and select the appropriate session in PaperCept Conference Management System.

Important dates

May 12, 2013	Submission of draft papers and invited sessions
July 1st, 2013	Notification of acceptance
July 14, 2013	Submission of final papers and early registration deadline
August 26-27, 2013	Conference
